FOLKETINGET  
RIGSREVISIONEN

February 2026  
– 9/2025

Extract from Rigsrevisionen's report  
submitted to the Public Accounts Committee

# The protection of the Defence's particularly critical networks

Rigsrevisionen has examined the Ministry of Defence's protection of the particularly critical networks that the Danish Defence uses to communicate about classified information.

The study has given rise to a number of critical remarks.

With reference to the current foreign and security situation, the Ministry of Defence has assessed that the results of our study cannot be made public, as the information is confidential, cf. section 27 of the Public Administration Act and section 152 of the Criminal Code. Rigsrevisionen has no grounds for setting aside this assessment.

In connection with this report, Rigsrevisionen has submitted a confidential memorandum to the Danish Public Accounts Committee. The memorandum is classified "FOR OFFICIAL USE ONLY" under the Security Circular, following a request from the Ministry of Defence.
